## LaPorte County Courts

Ensuring the just execution of the county's laws, the court system is an invaluable component of LaPorte County government. Here, citizens can access a range of judicial services and information: important searches and directories, such as the sex offender registry and missing children search, often-requested information about marriage licensing and juvenile probation, as well as a variety of forms for electronic download.

Several informative court webcasts are available for viewing on the Indiana State Government website. Click [here](#) to visit.
